## **Internet Safety Tips for Teachers, Parents and Carers:-**

- \*\*PC's and other internet enabled devices (Ipod, Iphones, Xbox)**SHOULD** be in a common area of the house **NOT IN THE BEDROOM!**
- \*\*Parental monitoring is vital – walk past and see what your child is doing, who they are talking to and what sites they are on....be aware if their mood changes.
- Make sure there is no response to rude or harassing emails.  
(keep a record in case of further investigation)
- Advise your student/child to immediately exit any site that makes them feel uncomfortable or worried. Basic protective behaviour principles apply.
- If harassment continues....the current email account can be deleted and a new one started. The new email address should only be given to a selected few.
- If receiving harassing messages on MSN /Facebook etc - have the sender blocked.
- If you have found inappropriate content about your child or one in your care on a website or are informed about this situation please contact the ISP and or Police or advise the parent to do so a.s.a.p.
- Have a family internet contract and set house rules about what information your child can put onto websites or share with others, where they go online and what they do. You (adult) need to be in charge.
- Be aware the majority of children **WILL NOT** tell a parent/teacher if bullied or harassed online for fear that they will loose internet access!! NEVER threaten total disconnection!
- Make sure that your children understand that they will not get in trouble if they tell you about a problem.
- Parents must learn about the internet with their child – get students to share their knowledge of the internet with their parents in a fun environment
- Spend time online with children, just as you would with many other activities such as sport, board games and walking the dog - learn and explore together
- Install filters and other monitoring/blocking software to minimise dangers. This is already done in schools but homes should have up to date filtering software installed at home.
- Know the sites they are accessing to ensure suitability. Filters **CAN** *sometimes* fail to protect and can be bypassed by a 'tech savvy' child.
- Learn the lingo so that you can decipher some of the content if required. Advise parents to do the same.
- **ABSOLUTELY NO EXCHANGE OF PERSONAL INFORMATION!**
- Children Under 13 **ARE NOT ALLOWED** on FACEBOOK. Don't support your child to break the rules.
- Social Networking Profiles such as Facebook **MUST BE SET TO PRIVATE.**
- MSN contacts and social networking site friends should be people that your child knows in real life. This is one way to reduce possible risks. Anyone can be anyone online.
- Teach children that information on the internet is not always reliable.
- Very close supervision for young children is recommended. There should be a limit to the email correspondence/msn to be a list of friends and family that has been approved.
- Set up an MSN, Facebook, MySpace account....whatever your children use and engage with them online. This also allows you to know how these applications work.
- If your child is playing online games it is **YOUR** responsibility to make sure that **YOU** know how to play the game too in case of problems. Play online games together.
- Do not let young children 'google' aimlessly with no supervision. Children need to be taught about search engines and how they work.
- The internet and the various applications are a lot of fun and a wonderful tool.....maximize the benefits and surf safely together!

***Please note that this list is by no means exhaustive and that there is no guarantee that adherence to these tips will provide 100% protection or safety for those using the various applications of the internet.***
